

Jack Herer Auto

Big Yields, Amazing Flavors and High Potency in Memory of a Legend!

- **High-grade resin.** The amount and quality of resin combined with the strong terp profile makes it a perfect choice for picky hash heads.
- **Multiple award-winning.** In honor of the famous activist, our upgraded version of the prized genetics.
- **Effectively short and compact.** Despite her Sativa background, this plant grows around 90cm while producing 500gr/m2 in just 63 days.
- **Bold flavors.** Offers a savory-sweet taste that expresses the whole spectrum of floral and fruity terpenes.
- **Peaceful and pleasant high.** Provides a relaxing effect while also keeping you centered, a perfect smoke for beginners, or those with a low tolerance.

The multiple award-winning strain. A perfectly sized, Sativa dominant plant with impressive yields. THC levels can hit the 21% mark, however her effects are a true representation of Indica and Sativa and will be very pleasant and not overpowering. Despite her short lifespan of 9 weeks, yields of 400-500gr/m2 can be expected. Big flavors and big yields are one thing this autoflowering variety certainly offers, making her perfect for commercial growers.

Bud description

Her buds are long and fat with a mass of swollen calyxes that are heavy-set throughout the bud. The buds are very large and coated with bright orange hairs and drenched with trichomes. A truly impressive specimen that resembles more Sativa in structure as she has such a large size and density.

Smoke report

The effects after smoking Jack Herer Auto are very pleasant and allow you to quickly unwind while maintaining a focused and alert mindset. As she is a fine balance of Indica and Sativa, she is absolutely perfect for smokers with a low tolerance, or are new to smoking Cannabis due to the upbeat and euphoric effects. Also a great strain for waking up with a clear head and getting through a long day stress-free, and works fantastically for gaming, musicians, and artists.

Plant Appearance

A medium-sized strain that will grow between 70-90cm in height, despite her Sativa background, growers with short spaces can produce exceptional yields of beautiful buds. As she flowers, her growth structure will be multi-side branches that over the space of 9 weeks will fill out from top to bottom. When she starts flowering, there will be a prolific amount of white pistils, that will be an indication of how productive this girl is. Trichomes ooze from every part of the buds, meaning this strain is strongly recommended for hash heads. She produces a wonderful aroma when blooming that can be described as peppery, spicy, fruity with a hint of mango and citrus.

Grow Tips

Original Auto Jack Herer can be grown closely together in a Sea of Green, and also be grown multiple times per years outdoors. She performs very well outdoors in colder weather, however, can achieve outstanding results in a hot climate. She may take a little longer to trim the buds than normal, yet will reward you will an abundance of sugar leaf so get your trim buckets ready.

Flavor

A sincerely unique combination that takes on an earthy-sweet, smooth spiced, pepper, and citrus edge. A very savory-sweet flavor that expresses the full spectrum of floral and fruit terpenes. A mix of sweet, peppery, fruity, and spicy.
