

OG Kush Auto

Next Level Potency and Delicious Kush Flavor.

- **One-hit wonder.** An extremely potent and long-lasting body high, ideal for medicinal consumers.
- **The original classic... but better.** Thanks to her Californian heritage, expect an improved terp profile and effect.
- **Unbelievably resilient.** Expect exceptional results in all types of climates.
- **First-class pungency.** Reeks of an extremely loud citrus, pine, and earthy aroma.
- **Solid hybrid.** The auto version of this old-school strain produces up to 550gr/m2 in just under 65 days.

The most powerful autoflower strain from Fast Buds Originals! She is easy to grow making her a wise choice for beginner growers. She has an extremely loud terpene profile consisting of pine, citrus with an overpowering pungency. A true expression of the world-famous O.G Kush, this autoflowering hybrid will test up to 23% THC making her a contender for the strongest strain on our Original Line. Thanks to her Californian heritage, this lady is used to hot days and cold nights so will perform with exceeding exception results in all types of climates. Due to her highly potent and sleepy effect, she is best suited for smokers with a high tolerance and those who enjoy long-lasting couch-lock effects.

Bud description

O.G Kush Auto will produce a heavy set and dense buds that reek with a strong pine fragrance. The calyxes are very dense and despite her having a smaller, bulky and stocky characteristic, her extra loud terpene profile and ridiculous potency certainly make up for it, as well as the insane amounts of frost each bud produces.

Smoke report

The effects of this lady are devastatingly potent and not for the light-hearted. Smoking this will induce a high that is slow, heavy-bodied, and extremely long-lasting. Too much of this strain will send you to sleep or at least feel like you are fighting that feeling off. A perfect strain for medical patients looking for therapeutic benefits or those looking to put their feet up and smoke themselves into a dream coma.

Plant Appearance

Original Auto O.G Kush will grow with thin branching and short internodal spacing. Thanks to her Indica dominance, her profile will be medium to tall sized where yields of 450-550gr/m2 can be harvested in 63 days. Her easy to grow nature makes her a perfect choice for those new to growing autoflowering Cannabis, where she will produce one main central cola, with long thin side branches.

Grow Tips

Be careful if growing this strain outdoors, when she flowers her terpenes will really begin to stink, so be vigilant of neighbors and the aroma. It is possible to grow O.G Kush Auto in cold climates as she is used to the cold California night times. Thanks to her Indica heritage, this lady can take a big feeding on a regular basis, so be prepared to increase the strength of your nutrient solution when growing this strain. She will require little maintenance once planted and will finish with a medium tall sized profile.

Flavor

The flavor can be described as a profound blend of pine, citrus, and a pungent earth. Kush lovers will go crazy for this lady as she coats the palate with a combination of smoky creamy citrus and chemicals with a distinct kerosene overtone.
