

## Forbidden Runtz Auto

The Oh-So Famous Runtz Now in Autoflowering Form!

- **Nugs fit for a king.** Huge and dense nugs for those who enjoy that top shelf appearance.
- **Extraordinary Yields.** Expect up to 550gr/m<sup>2</sup> in just under 65 days!
- **Beginners dream strain.** Everything that makes good genetics good without needing much maintenance or extra effort.
- **Flavorful flowers.** A terpene-rich strain that's up to par with even the most demanding smokers.
- **Among the strongest of all times.** With 26% THC, an unforgettable high even for avid smokers.

An Indica-dominant hybrid that can reach up to 130cm, skillfully selected and bred to offer growers of any level the top-quality traits that made its parents so popular in California; This high yielder can produce up to 550gr/m<sup>2</sup> in just under 65 days, making it ideal for those who are looking for high-quality buds in a relatively short amount of time. You can expect a delightful and flavorful blend of aromas that thanks to the impressive 26% THC results in a cerebral high that hits you between the eyes and slowly turns into a strong corporal relaxation.

### Bud description

The buds grow denser than most Indica-dominant hybrids, they develop a pointy almost spear-shaped appearance and swollen calyxes with a few thin light-orange hairs spaced out around them and a thick layer of resin all over the buds that give them a whitish-green color. You'll see a lot of sugar leaves with piles of trichomes that give you an idea of what to expect even before harvesting, meaning that this strain hits hard and it's suited for the most demanding consumers.

### Smoke report

Forbidden Runtz Auto provides an overall balanced effect; Expect a slightly stronger corporal high that won't leave you couch-locked at first, letting you laugh and enjoy its Sativa heritage before leaving you melting in the nearest couch, taking all physical pain and worries away. A marvelous effect if you are looking for a complete effect suited to go out with friends or do your chores and watch your favorite movie or series on the couch after the day is over.

### Plant appearance

Look forward to a main stem that can reach an average of 130cm surrounded by several long and thick side branches that can get almost as big as the main cola. A truly bushy variety that won't be afraid to show its hybrid vigor. This strain grows large fan leaves with several thin fingers out of every internode, where you'll also see rounded golf ball-sized nugs developing, finishing with an obelisk-shaped main bud at the top. An extraordinary yielder that will reward you with up to 550gr/m<sup>2</sup> of high-quality buds, the perfect choice for extractors seeking a first-rate resin producer.

### Grow tips

We highly recommend using a scrog net or bamboo stakes to provide support for the branches due to the dense buds that may end being too heavy for the branches to withstand. Due to the bushy foliage, we suggest performing LST techniques such as tying down the branches or slightly defoliating if you're experienced enough, this way you allow the light to reach deeper and provide a better airflow in between the buds, thus increasing yields, and preventing mold and bugs. Remember to flush thoroughly one week before harvesting to make sure the true flavors and aromas come out during the curing process.

### Flavor

On the inhale, this strain offers that notorious forbidden fruit flavor but with an unusual mix of fruity and sweet flavors, and a touch of earthy terps, resulting in a creamy and pleasant smooth smoke which slowly turns into a distinct almost candy-like flavor with citrusy undertones that leaves your mouth with a delicious aftertaste. An ideal choice for smokers who enjoy strains that keep you guessing with every hit.
