

## Cream Cookies Auto

The Smoothest Combination of Cookies 'n Cream.

- **Cream n' cookies.** The perfect recipe now in auto version.
- **Short and discreet.** An Indica hybrid leaning to the shorter side, this strain can grow up to 90cm, perfect for discreet outdoor grows.
- **Creamy couch-lock.** Enjoy an uplifting effect that will slowly turn into a relaxing couch-lock, perfect for chilling at home.
- **Beautiful colors.** Expect bright green buds with purple hues and reddish tones when flushing.
- **Smoother than silk.** A rich kush flavor with sweet cookie-like undertones make for the smoothest smoke you've experienced.

We refined our GSC line and created the perfect recipe for Cream Cookies Auto. This Indica dominant strain grows no higher than 90cm, is easy to manage, and delivers potent, yet subtle Sativa highs accompanied by an overall relaxing Indica sensation. A potent strain with up to 23% THC. Kushy tastes showered in sugary terpenes make it a smooth smoke and reminds its users of the perfect combo; Cookies and Cream.

### Bud description

A mixture of colors made up of green bud, orange pistils, and purple hues all coated with sticky layers of resin, letting off pungent kushy sweet scents reminding its users of Cream and Cookies.

### Smoke report

Kicking off with an uplifting high, which slowly merges into a more chilled, relaxed vibe that's somewhat couch-locking. Ideal for enjoying a classic movie or listening to your favorite music on a relaxed summer evening. Novices may be subject to heavier lethargic effects.

### Plant Appearance

With average sizes of around 60-90cm, this strain has more of an Indica structure and an average internodal spacing. The plant will develop a large main cola with some side branches, all glistening with resin and with some leaves boasting light reddish colors after flush.

### Grow Tips

A very quick growing versatile strain that will do well in various grow-op setups. More experienced growers can definitely go for LST on this strain. Nutrients are welcome, users may want to dose lightly and work their way up, making sure that they check the pH level of the water before feeding, generally trying to maintain around 6.5 to avoid stunting the plant's growth.

### Taste

Where the Cream meets the Cookies. This smooth smoking strain will give you a rich bold Kushy flavor, layered with sweet undertones giving it a sweet yet solid cookie-like tang. These complex flavors are then met by a smooth easy-inhaling smoke, that goes down like cream.
